

THE TIMED MOZAMBIQUE DRILL

ADVANCED

1X

2X

5.5' Total Height

3 - 7 Yards

INSTRUCTIONS

Place 5" circle i-MTTTS 4' to 5' from ground on solid surface or against a silhouette target. Turn on and set to setting (A,C) for double tap.

Place LaserPET 1.5' higher than the i-MTTTS vertically in line with the i-MTTTS. Turn on the PET and set to setting (2) for single shot timer. Do not put a target card in to the PET.

Stand 3 to 7 yards (9' to 21') away from the targets.

From a holstered position wait for the PET draw timer to start and then quickly draw, fire 2 shots on the i-MTTTS and 1 shot on the PET as rapidly and accurately as possible. Your total time will be displayed.

Targets will reset automatically.

To make the drill more challenging replace the i-MTTTS target with a 3" circle target card and use the 1" or 1/2" circle card for the LaserPET.

EQUIPMENT NEEDED

- *Double-Action SureStrike Equipped Firearm*
- *i-MTTTS Target*
- *LaserPET (Personal Electronic Target)*

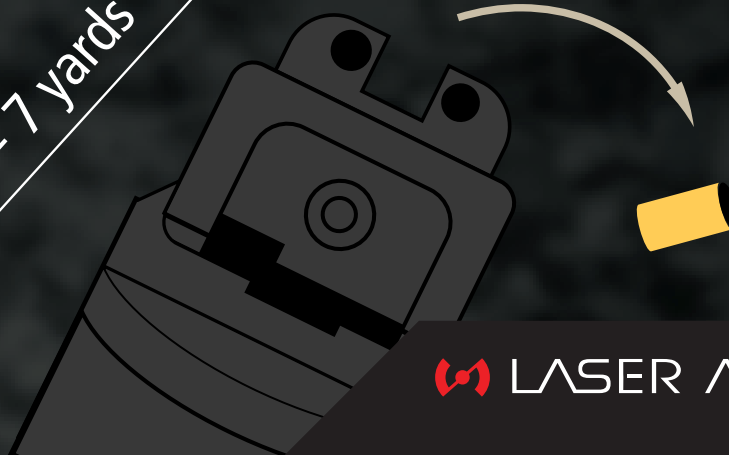

STOVE PIPE DRILL

BEGINNER

4' - 6'

3 - 7 yards

 LASER AMMO

INSTRUCTIONS

Place PET on a surface or tripod 4' to 6' from the floor. Use any target card for this drill. Set LaserPET to Mode (2)

Set up a stovepipe malfunction: A stovepipe occurs when the casing from the fired round is not fully ejected. It is caught in the ejection port by the slide.

Stand 3-7 yards away and clear the malfunction when the target starts.

Firmly tap the bottom of the magazine with the base of your palm. "Roll" the firearm approximately 90° to the right to "tip" the ejection port.

Rack the slide firmly and completely all the way to the rear. The jammed casing will fall out as the pressure has been released and the gun is rolled to the side.

Visually check and assess your target. Engage the target with one shot. Try to decrease your time each try.

Target will reset automatically. Repeat.

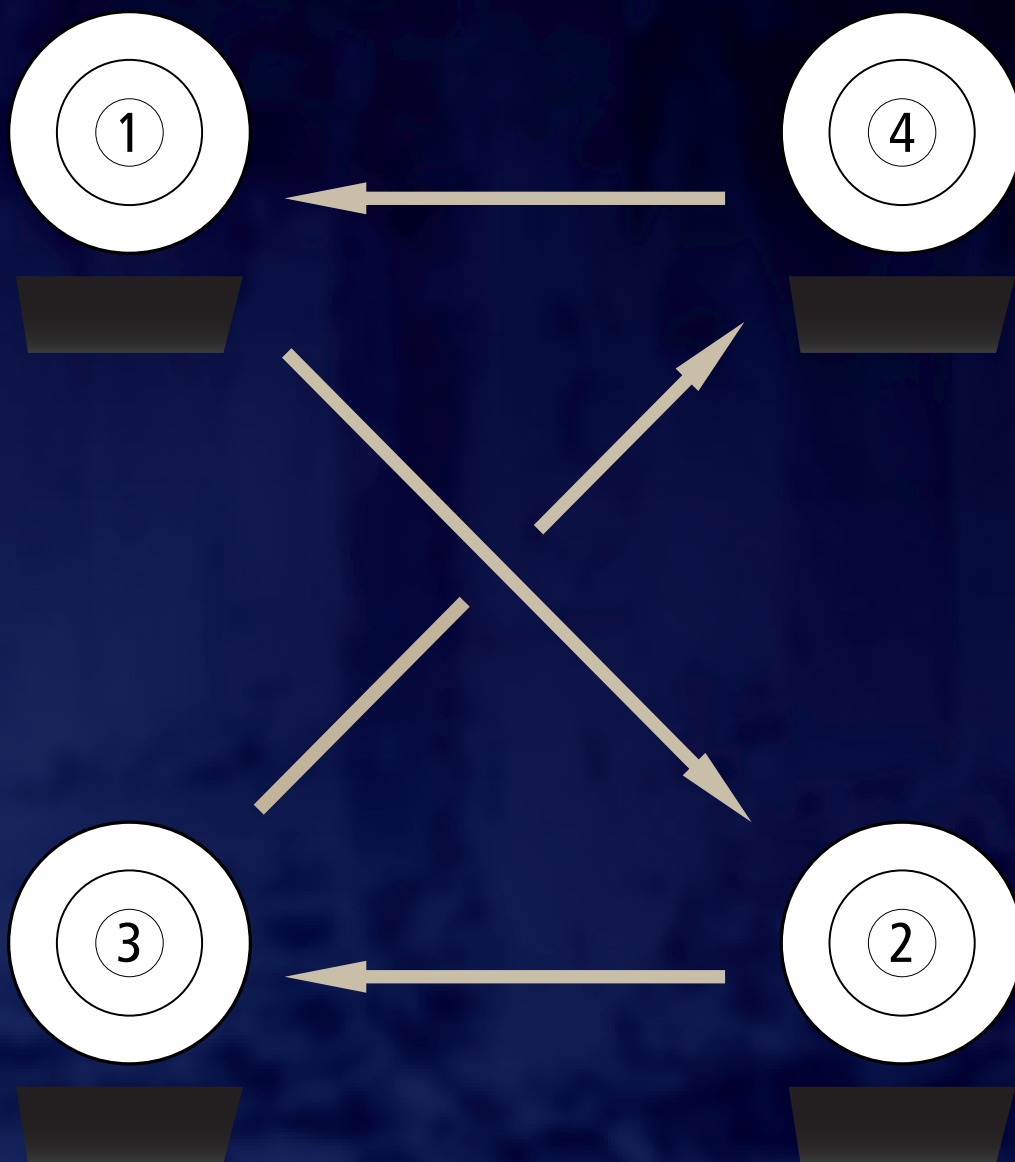

EQUIPMENT NEEDED

- *Double-Action Surestrike Equipped Firearm*
- *1X Laser PET with any target card*

FIGURE-8 DRILL

INTERMEDIATE

INSTRUCTIONS

Using the 5" circle cards, set up two i-MTTs with 3 yards between them.

3 yards below that place two more i-MTTs forming a box. Set targets on Mode (A,C) for double shot.

Stand 5 to 7 yards away in front of the targets.

Engage the top left target with 2 shots and in a figure-eight motion engage the bottom right target.

Continue the upper right target with 2 shots before continuing to the lower left target with 2 shots.

Targets automatically reset. Repeat.

To increase difficulty, increase your distance from the targets.

EQUIPMENT NEEDED

- *Double-Action SureStrike Equipped Firearm*
- *4x I-MTTs*
